Project Objective

The Office of Head Start Monitoring Support (OHSMS) contract involves high-level, proactive communication with the Office of Head Start Quality Assurance Division (OHS/QAD) to implement the OHS/QAD monitoring activities and quality assurance initiatives.

Challenge and Solution

Danya provides all required and necessary services, from materials, equipment, and recruiting and training consultants, to providing logistical support and collecting and analyzing data to produce final reports for all of the HS Grantees. Program assessment and performance measurement are central to this contract. Danya supports an elaborate protocol for data collection, including reviewer profile information, Grantee organizational and program information, program assessment costs, and Grantee needs and gaps. From this information, Danya conducts content and report analyses, as well as policy assessments, such as performance attainment and impact analyses of OHS policies on HS Grantees and the program's outcomes.

The Result

Danya has delivered new technology solutions to the OHS management that provide real-time, as-needed information on all aspects of the OHSMS program.
